

# Onsite Energy Outdoor Solar Lifetime China

Is onsite solar a good option for C&I?

Onsite solar is the primary opportunity for corporates to focus on in China.

A steep drop in costs has resulted in greatly improved returns, making PPA's for onsite generation an attractive option for C&I's.

In addition, the Chinese government offers a subsidy for onsite solar generation of ¥.37/kWh (about \$.06/kWh).

Does China offer a subsidy for onsite solar?

In addition, the Chinese government offers a subsidy for onsite solar generation of ¥.37/kWh (about \$.06/kWh).

In 2018, this subsidy decreased for the first time, and is expected to continue to decrease in the coming years.

How much solar power does China have in 2021?

In 2021, 53 GW of solar power capacity was added in China-40% of the global total. At year end, total solar power capacity reached 307 GW. In the first half of 2022, roughly 31 GW of solar power were added to the grid in China. China also leads the world in solar manufacturing, as it has for many years.

Does distributed solar work in rural China?

Research is showing the impacts of distributed solar projects in rural China.

Huiming Zhang, a renewable-energy economist at the Nanjing University of Information Science and Technology says that overall, SEPAP has been successful.

Where are China's solar resources located?

While China's solar resources are best in the northern and western regions, in recent years more solar has been installed in the populous eastern areas of the country.

This is reflected in the top five provinces in installed solar capacity: Shandong, Hebei, Jiangsu, Zhejiang and Anhui.

Is solar power a good investment in China?

Solar power presents an increasingly attractive prospect for commercial and industrial (C&I) energy buyers with operations in China.

Between 2011 and 2015, the global average price of solar PV modules dropped between 75-80 percent, with steady declines predicted to continue.

The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility-scale solar capacity installed in the United States...
